DeskShade Plus 1.2

The end of desktop clutter

A Quick Intro

Pasted Graphic 2.tiff ¬

1. When DeskShade Plus is launched, a little icon will apear in the menu bar. Clicking it shows the menu above.

2. Covering/uncovering the desktop: use the "Cover Desktop" menu item to toggle between hiding and showing your desktop icons.

3. To lock your desktop while you're away, click "Lock Desktop..."

4. The "Refresh Desktop" item should nto be necessary in the current version of DeskShade Plus. If the desktop picture DeskShade Plus did not change when it should, this item might help.

5. "DeskMovie..." shows you a dialog asking to select a QuickTime movie. Then you can set the options to use this movie as your desktop.

6. For more general and license info, select "About and License". Here you have to enter your license code when you registered DeskShade Plus.

7. Click "Preferences..." to set the many options DeskShade Plus provides: file dropping destination, DeskLock password and away message, hotkeys, ...

8. If you'd like to quit DeskShade Plus, select the last menu item.
